Well Improvements

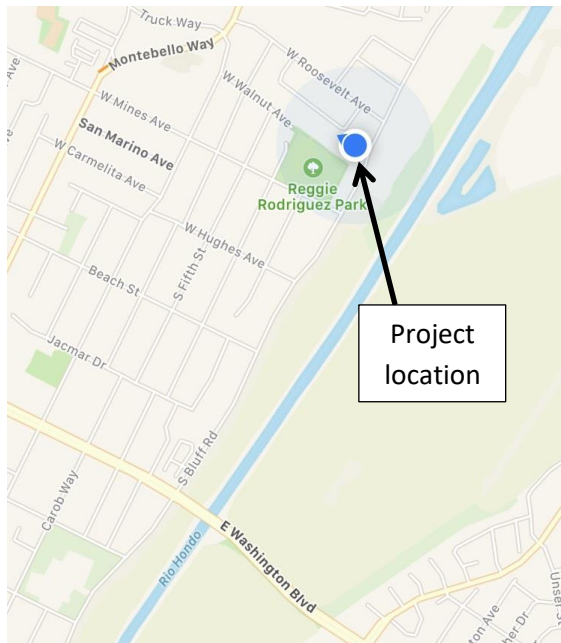

South Montebello Irrigation District

Well Drilling Project

January 17, 2020

Dear Property Owners/Residents:

South Montebello Irrigation District will begin the construction of drilling a new well at our main office location located at 437 Bluff Road next month.

This phase of the project is expected to be completed by the end of February 2020, barring any unforeseen problems and/or weather conditions.

During this period heavy equipment will be moving in and out of the work site. Due to the nature of the project, some 24 hour per day work will occur. Large sound walls will be installed around the project site to decrease the amount of noise.

We have taken all precautions to reduce the noise and dust caused by the construction activities in compliance with city regulations.

The construction of this water well will contribute towards the District's plan of replacing infrastructure that has reached its optimal or expected service life in conjunction with the continuous effort to offer the best possible water quality and service to our customers.

If you have any questions regarding your water or the project, please contact our Districts Project Engineer Jordan Betancourt at (323) 721-4735.

Thank you,

South Montebello Irrigation District
